CERTIFICATE

This is to certify that the activity work entitled ***"AICTE ACIVITY POINT PROGRAMMES"*** carried out at "Malleshwaram, Kadu Malleswara, Majestic, Bharavase office,Yelahanka" by **Ms. Latha Shree(1VA22CS059),** bonafide student of **SAI VIDYA INSTITUTE OF TECHNOLOGY**, Bengaluru, under **"AICTE ACTIVITY POINTS PROGRAMME"** in partial fulfillment for the award of Bachelor of Engineering in Computer Science & Engineering of **VISVESVARAYA TECHNOLOGICAL UNIVERSITY**, Belagavi during the year **2025-26.** The Activity report has been approved as it satisfies the university requirements in respect of Activity work points prescribed for the said Degree .

Dr. Ajay V G
AICTE Activity Point Coordinator
Dept. of CSE, SVIT

Dr. Shashikumar D R
Professor & Head
Dept. of CSE, SVIT

Prof. Anila Davis
AICTE Activity Point Coordinator, SVIT

Dr. Manjunath T N
Principal, SVIT

ACKNOWLEDGEMENT

The completion of AICTE Activity Points Programme brings with and sense of satisfaction, but it is never completed without thanking the persons who are all responsible for its successful completion. First and foremost I wish to express our deep sincere feelings of gratitude to my Institution, **Sai Vidya Institute of Technology**, for providing mean opportunity to do our education.

I would like to thank the **Management** and **Prof. M R Holla,** Director, Sai Vidya Institute of Technology for providing the facilities.

I extend my deep sense of sincere gratitude to **Dr. Manjunath T N,** Principal, Sai Vidya Institute of Technology, Bengaluru, for having permitted to carry out the activity work on **"AICTE Activity Point Programs "** successfully**.**

I am thankful to **Prof. A M Padma Reddy**, Additional Director and Professor, Department of Computer Science and Engineering, Sai Vidya Institute of Technology, for his constant support and motivation.

I express my heartfelt sincere gratitude to **Dr. Shashikumar D R**, Professor & Head, Department of Computer Science & Engineering, Sai Vidya Institute of Technology, Bengaluru, for his valuable suggestions and support.

I express my sincere gratitude to **Dr. Ajay V G**, Associate Professor, Department of Computer Science & Engineering ,Sai Vidya Institute of Technology, Bengaluru, for his constant support.

I express my thanks to **Prof. Anila Davis,** Assistant Professor, Department of Computer Science & Engineering , Sai Vidya Institute of Technology, Bengaluru, for her valuable suggestions and support.

Finally, I would like to thank all the Teaching, Technical faculty and supporting staff members of Department of Computer Science & Engineering, Sai Vidya Institute of Technology, Bengaluru, for their support.

Latha Shree 1VA22CS059

ABSTRACT

Participating in the AICTE Activity Programme has been an immensely enriching experience that allowed me to actively contribute to social welfare and community development. Through a wide range of service-oriented initiatives, I gained firsthand exposure to real-life challenges faced by various sections of society. This platform encouraged me to engage meaningfully with people from diverse backgrounds, fostering empathy, compassion, and social awareness.

The programme not only enhanced my communication, teamwork, and leadership skills but also helped me build a sense of unity and collective responsibility. Collaborating with peers on community-driven projects taught me the value of cooperation, time management, and problem-solving in real-world contexts. These experiences strengthened my ability to think critically and act responsibly while maintaining respect for cultural diversity and human values.

Moreover, the AICTE Activity Programme served as a bridge between academic learning and practical experience. It emphasized the importance of applying classroom knowledge to address social issues effectively, thereby promoting holistic development. By earning activity points through impactful and value-driven contributions, I cultivated a deeper sense of belonging and responsibility toward society.

Overall, this initiative has significantly contributed to my personal and professional growth, reinforcing the principles of ethical conduct, civic engagement, and lifelong learning. It has inspired me to continue participating in activities that create a positive difference, embodying the true spirit of value-based education and responsible citizenship.

CHAPTER 1

INTRODUCTION

The AICTE Activity Points Programme provided me with an incredible opportunity to extend my learning beyond the classroom through participation in socially impactful initiatives conducted by Bharavase, an NGO committed to community welfare and national development. As part of this programme, I engaged in multiple volunteering activities that focused on cleanliness, sustainability, food preservation, water management, and public awareness.

Throughout these programs, including Contribution to the Swachh Bharat Initiative, Developing and Managing an Efficient Garbage Disposal System, Developing a Sustainable Water Management System, Food Preservation and Packaging, and Spreading Public Awareness under Rural Outreach Programmes, I gained invaluable insights into real-world challenges and the importance of responsible citizenship.

Each activity not only deepened my understanding of social and environmental concerns but also enhanced my communication, teamwork, and leadership skills. I learned the significance of discipline, empathy, and cooperation while working toward a collective goal of community betterment. For instance, participating in the Swachh Bharat campaign made me more aware of the importance of cleanliness and waste segregation, while the sustainable water management initiative emphasized the urgent need for resource conservation.

Similarly, the food preservation and packaging project allowed me to explore innovative methods to minimize food wastage and ensure hygiene, while the rural outreach awareness campaign strengthened my connection with people in underdeveloped areas, enabling me to understand their challenges and contribute meaningfully to solutions.

Overall, these experiences not only fostered my personal and professional growth but also instilled in me a deep sense of social responsibility and environmental stewardship. The AICTE Activity Programme truly bridged the gap between academic learning and practical application, helping me evolve into a more conscious, empathetic, and proactive citizen.

Table 1.1 Activity Summary Sheet

Name of the program/ Activity Head	Panchayat/ District	Dates/ Total duration	Performance appraisal/ Maximum points/ activity	Remarks
1) Water Conservation	Rajankunte, Bengaluru	27/06/2024-04/07/2024 80 hours	20	Accomplished
2) Swachh Bharath	Yelahanka New Town, Bengaluru	22/09/2024 - 01/10/2024 80 hours	20	Accomplished
3) Garbage Disposable	Kadu Malleshwara, Bengaluru	10/02/2025-23/02/2025 80 hours	20	Accomplished
4) Food Packaging and Distribution	KSR Railway Station, Bengaluru	07/04/2025-20/04/2025 80 hours	20	Accomplished
5) Spreading Public Awareness	Malleshwaram, Bengaluru	01/06/2025-15/06/2025 80 hours	20	Accomplished

CHAPTER 2

AICTE ACTIVITIES

2.1 WATER CONSERVATION

2.1.1 Description of the Event

The Sustainable Water Management initiative was conducted at Sai Vidya Institute of Technology, Rajanukunte, with the aim of addressing the pressing issue of water scarcity and promoting efficient water utilization within the campus and nearby communities. This activity, organized under the Bharavase programme, focused on educating students and residents about responsible water usage, rainwater harvesting, and long-term conservation practices.

At the SVIT campus, we began by surveying the existing water usage patterns across various departments, hostels, and garden areas to identify possible areas of water wastage. Based on our observations, we designed simple awareness posters that highlighted the importance of saving every drop of water. The campaign encouraged practices such as turning off taps after use, fixing leakages immediately, and reusing laboratory and canteen wastewater for gardening purposes.

With the help of faculty mentors, we visited the water harvesting pit installed within the SVIT campus to study how collected rainwater was filtered and stored for later use. These practical demonstrations helped us understand how theoretical concepts of environmental engineering are applied in real-life sustainability efforts.We also discussed the growing problem of groundwater depletion in Bengaluru's outskirts and how community participation can help restore the balance. Another key part of the activity included a cleanliness drive near local drainage lines and water outlets within the college vicinity. We removed litter, plastic waste, and debris that could block water flow and lead to stagnation. Through this, we emphasized the connection between waste management and clean water preservation.

This experience was truly eye-opening. It helped me realize the direct relationship between human activities and environmental sustainability. Working in a team at SVIT Rajanukunte allowed me to see how educational institutions can take the lead in promoting eco-friendly practices. I learned that even small changes such as reusing water or maintaining clean surroundings can have a lasting impact when practiced collectively. The activity strengthened my commitment to environmental stewardship and motivated me to advocate for sustainable resource management in both my campus and community.

2.1.2 Activity Images

2.2 SWACHH BHARAT

2.2.1 Description of the Event

As part of the nationwide Swachh Bharat Abhiyan campaign, this activity was conducted in collaboration with Bharavase and the Bruhat Bengaluru Mahanagara Palike (BBMP) in Yelahanka, Bengaluru. The initiative aimed to raise awareness about cleanliness, hygiene, and proper waste disposal while actively contributing to the beautification of public areas. The program's core objective was to engage volunteers in community-driven actions that would help achieve the vision of a clean and sustainable environment.

Our group of volunteers, guided by coordinators from Bharavase and BBMP officials, began the activity by identifying public areas in Yelahanka that required immediate attention such as roadside markets, bus stops, footpaths, and small community parks. Equipped with gloves, brooms, and garbage collection bags provided by the BBMP, we undertook an extensive cleaning drive that involved sweeping streets, removing litter, and collecting segregated waste for proper disposal.

The collected waste was carefully separated into biodegradable and non-biodegradable materials. Biodegradable waste was sent to composting units, while plastic and other non-recyclable materials were handed over to authorized waste collection points managed by BBMP. The volunteers also painted awareness slogans on compound walls to remind people about their role in keeping the environment clean and litter-free.

To further engage the public, we organized interactive awareness sessions for local residents, shopkeepers, and students in the nearby area. These sessions focused on the importance of cleanliness, waste segregation, and the harmful effects of plastic pollution. We emphasized the principles of the "3Rs" Reduce, Reuse, and Recycle, demonstrating simple, practical ways in which individuals could implement these in daily life. Informative posters and banners were displayed to encourage sustained behavioral change toward hygiene and sanitation.Participating in this activity was an enlightening experience. It taught me the value of teamwork, civic responsibility, and consistent effort in maintaining public hygiene. Seeing visible improvements in the area after the drive instilled a deep sense of pride and accomplishment. This experience also strengthened my determination to support cleanliness initiatives in my surroundings and to inspire others to contribute to the vision of a Clean India – Green India.

2.2.2 Activity Images

2.3 Developing and managing efficient garbage disposable system

2.3.1 Description of the Event

As part of the This initiative was conducted at Kadu Malleshwara Temple, Malleshwaram, Bengaluru, under the guidance of Bharavase. The main objective of the activity was to promote responsible waste segregation, reduce littering, and develop an efficient garbage disposal model around a high-footfall religious and commercial area. Temples and markets often generate large quantities of biodegradable and non-biodegradable waste, making proper waste management essential for hygiene and environmental health.

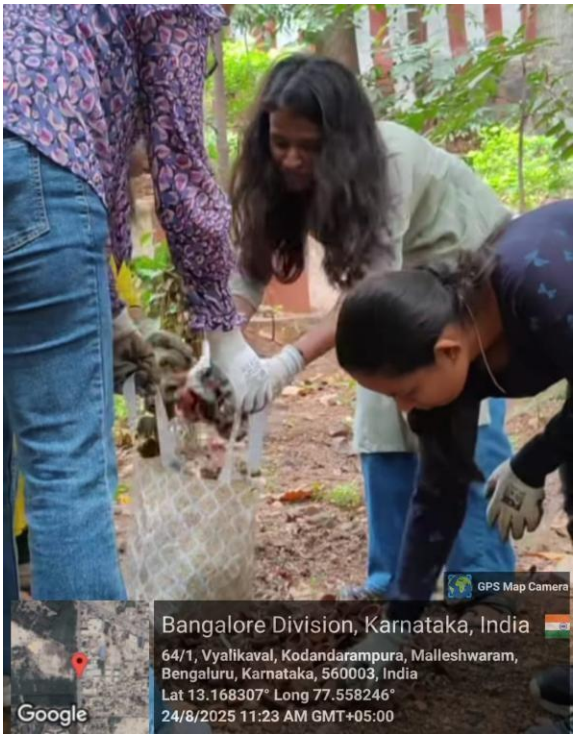
Our team of volunteers began by observing and analyzing the waste generation patterns around the Kadu Malleshwara Temple and surrounding streets. We noticed that the majority of waste consisted of flower garlands, leaf plates, plastic bottles, and food wrappers discarded by visitors and nearby vendors. To address this, we collaborated with temple authorities and BBMP workers to introduce a two-bin system for wet and dry waste segregation at multiple points within the temple premises and adjacent streets.

We also conducted awareness sessions for shopkeepers, devotees, and street vendors, explaining how segregating waste at the source could prevent pollution and make the environment cleaner. Demonstrations on composting flower waste and biodegradable materials were organized within the temple compound. The flower waste collected daily was shown to be composted naturally using a simple pit method, converting it into organic manure that could be reused for the temple garden and nearby parks.

The most rewarding part of the program was witnessing the participation of temple visitors and nearby residents who appreciated the effort. Many volunteered to maintain cleanliness by properly disposing of their offerings and garbage. The temple staff also pledged to continue using the two-bin segregation system even after the completion of our campaign.

This activity gave me practical insight into how local collaboration between citizens, volunteers, and civic bodies can create long-term impact. It helped me understand the importance of structured waste segregation and the role of continuous awareness in maintaining clean public spaces. The experience also reinforced the value of sustainable urban management practices and how even small-scale initiatives can drive meaningful environmental change in densely populated areas like Malleshwaram.

2.3.2 Activity Images



2.4 FOOD PACKAGING AND DISTRIBUTION

2.4.1 Description of the Event

As part of a meaningful social responsibility initiative titled **"Bharavase Butthi,"** a team of volunteers actively participated in food packaging and distribution for underprivileged individuals in Bengaluru. The activity was conducted from **07/04/2025 to 20/04/2025**, beginning each day at the **Malleshwaram Bharavase Office**, where volunteers collaborated to prepare, pack, and organize nutritious meal packets.

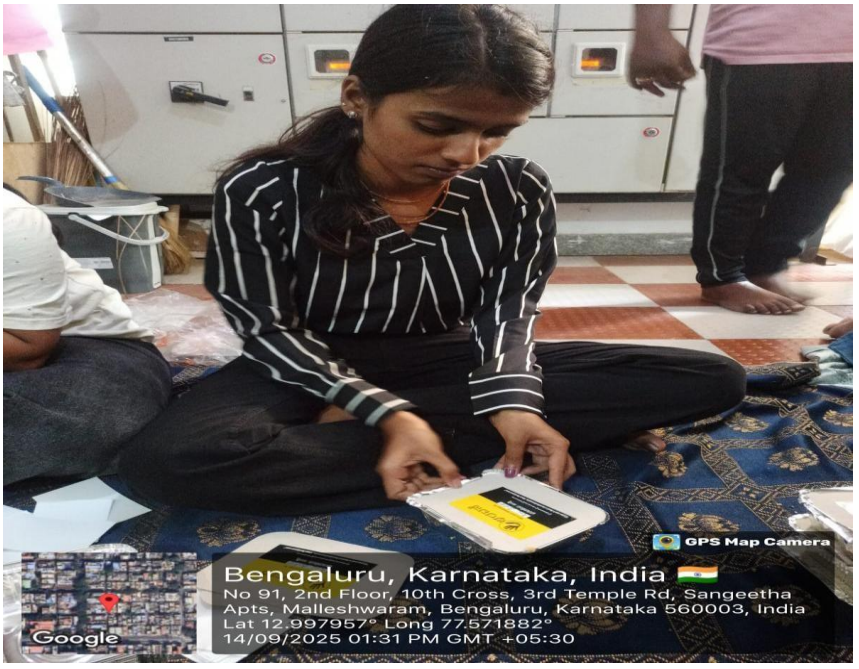
Approximately **200 to 250 food packets** were prepared daily, ensuring hygienic handling, proper sealing, and efficient categorization for smooth distribution. Volunteers worked systematically to maintain quality and speed, learning essential teamwork and logistics skills in the process. The spirit of service was evident as everyone contributed to different stages—washing, cooking, packing, labeling, and arranging the food packets for transport.

After the packaging process, the volunteers traveled to **Majestic – KSR Railway Station, Bengaluru**, one of the city's busiest transit hubs, where hundreds of people struggle to access affordable meals. Food distribution took place during **lunchtime**, reaching daily wage workers, travelers, and homeless individuals who were in immediate need. The atmosphere was filled with gratitude as recipients collected their meals with warmth and appreciation.

This initiative not only helped address hunger but also gave volunteers firsthand experience in understanding the challenges faced by vulnerable communities. Engaging directly with people from diverse backgrounds provided valuable insights into social inequality, hunger, and the importance of compassion-driven community outreach.

The activity served as a powerful reminder that even small efforts—such as packing and distributing meals—can bring hope and dignity to many lives. The success of "Bharavase Butthi" reinforced the value of collective action and strengthened the volunteers' commitment to continuing similar humanitarian initiatives in the future.

2.4.2 Activity Images



2.5. SPREADING PUBLIC AWARENESS – PROMOTION OF PAPER BAGS

2.5.1 Description of the Event

Digital During the annual **Kadle Kai Parishe** in Malleshwaram, volunteers organized a public awareness activity focused on promoting the use of **paper bags created from recycled newspapers**. The event was held at **Kadu Malleshwara Temple**, where thousands of visitors gather during the festival, providing an ideal platform to promote eco-friendly habits.

The activity began with volunteers collecting waste newspapers from surrounding households, shops, and community spaces. These newspapers were then creatively transformed into practical items such as paper bags, envelopes, pouches, and simple decorative crafts. This process showcased how everyday waste materials can be reused to create something valuable and environmentally friendly.

A dedicated stall was set up at the festival where these recycled paper bags and items were displayed and distributed to the public. Volunteers interacted with visitors, explaining the environmental disadvantages of plastic bags and highlighting how simple recycling practices can significantly reduce waste. Many festival-goers appreciated the initiative and showed interest in adopting similar recycling practices in their daily lives.

To engage the younger audience, **mini workshops** were conducted at the stall. Children were taught how to make their own paper bags and small craft items using old newspapers. These interactive sessions not only encouraged creativity but also helped instill awareness about recycling from a young age.

The entire experience was impactful, as it demonstrated how simple, community-driven actions can raise environmental consciousness. The positive response from the public reinforced the importance of sustainable living, and the initiative encouraged continued efforts toward promoting eco-friendly alternatives within the community.

CHAPTER 4

CONCLUSION

Participating in the AICTE Activity Points Programme organized by Bharavase has been a truly transformative and enriching journey. Through these activities, I was able to bridge my academic learning with real-world experiences while contributing meaningfully to society. Each initiative helped me understand the importance of teamwork, environmental sustainability, and social responsibility. The Swachh Bharat Initiative at Yelahanka gave me firsthand experience in cleanliness drives and civic participation, teaching me that maintaining hygiene is a shared responsibility that benefits everyone. The Garbage Disposal and Waste Segregation Programme at Kadu Malleshwara Temple deepened my understanding of proper waste management and showed how simple efforts such as segregation and composting can have a lasting positive effect on the environment.

The Sustainable Water Management project at Sai Vidya Institute of Technology, Rajanukunte, was an eye-opening experience that made me realize the value of conserving water through techniques like rainwater harvesting and reuse. The Food Preservation and Packaging activity conducted at Majestic and Bengaluru Railway Station helped me learn about food safety, hygiene, and eco-friendly packaging methods to reduce wastage and pollution. The Public Awareness Programme during the Kadlekai Parishe at Malleshwaram was one of the most memorable experiences, where we interacted with rural vendors and the public to spread awareness about hygiene, waste reduction, and the use of paper bags instead of plastic.

Overall, these activities have enhanced my communication, leadership, and problem-solving skills while making me more empathetic and socially conscious. This programme taught me that even small contributions can lead to meaningful change when people work together with dedication and purpose. It inspired me to be a responsible citizen and to continue promoting cleanliness, sustainability, and community welfare in the future.
